REGAIN YOUR MOBILITY and INDEPENDENCE
Foot drop and hand paralysis result from injuries or illnesses that adversely affect the central nervous system. Bioness technologies use functional electrical stimulation (FES) to activate the nerves that control the muscles in the leg or hand and forearm, allowing for more natural function.

These advanced systems may help you reclaim your freedom and get back into life if your condition is due to:

- Stroke
- Multiple Sclerosis
- Traumatic Brain Injury
- Incomplete Spinal Cord Injury
- Cerebral Palsy

Call TODAY 800.211.9136 option 2
The award-winning L300 Foot Drop System stimulates the nerves in your lower leg, activating muscles to lift the foot and help you to walk more naturally. The L300 automatically senses when your foot is on or off the ground and adjusts to changes in walking speed and terrain.

The L300 System may offer a variety of advantages to help people with foot drop:\(^1\,^2\):

- Provide more natural movement when walking
- Promote increased speed, stability and confidence
- Reduce falls\(^2\)
- Re-educate muscles
- Prevent or slow muscle loss (often called atrophy)
- Maintain or increase range of motion in the ankle and foot
- Increase local blood circulation

The L300 Plus System adds a thigh cuff that activates the nerves controlling the major muscles of the leg, providing better knee control and additional stability. The system provides an even greater sense of confidence to enjoy a variety of activities.

"The Bioness gave me something that MS took away"

– Kerrie, L300 user\(^*\)

The Next Step FORWARD

Regain More NATURAL Hand Function

The H200 Wireless System activates the nerves that control the muscles in the hand and forearm, enabling you to open and close your hand. The system may help you regain function in your hand and wrist to get back to independent daily activities.

In addition to helping you regain hand function the H200 System may\(^3\,^4\):

- Improve active hand range of motion and function
- Re-educate muscles to function without the system
- Reduce muscle spasms
- Increase local blood circulation
- Prevent muscle loss (atrophy)

Available in Regular & Small cuff sizes

The system provides an even greater sense of confidence to enjoy a variety of activities.
